Mockup:

3.   Special Requirements

3.1   Other devices

As this POS application is targeted towards small retail business we expect it to run on screen sizes of desktop computers. As this is a web application and as such can potentially be used in mobile devices too, we should keep in mind to make singular UI components not too large to make it easier to adapt to smaller screens should the need arise. This explicitly is not a must and must in no way stand in the way of other important design decisions.

4.   Preconditions

4.1   Entering the view

The window will only appear during the first start of the cash at a day.

5.   Postconditions

n/a

6.   Extension Points

n/a
